Jonatan Rodriguez

(832) 443-7009 | j.rodriguez0721@icloud.com | LinkedIn | GitHub | Portfolio | Houston, TX

Summary

Computer science graduate from the University of Houston who builds with Python, TypeScript, and C++ and uses Claude Code and Cursor daily while reviewing every AI-generated suggestion. Shipped a client website with Next.js, trained a TensorFlow model on 400,000+ health records, and built an SBERT semantic search tool over 210,762 reviews. Looking for an entry-level software, AI, or IT role where I can keep learning and building.

Education

University of Houston Graduated May 2026
B.S. in Computer Science, Dean's List (Spring 2026) *Houston, TX*
Coursework: Data Structures, Operating Systems, Cybersecurity, Statistics, Linear Algebra

Houston Community College Aug 2022 – May 2024
A.S. in Computer Science *Houston, TX*

Technical Skills

Languages: Python, C/C++, JavaScript, TypeScript, Bash, SQL (Fundamentals)
Web & AI: React, Next.js, Vercel, TensorFlow, SBERT, Matplotlib, CUDA, Claude Code, Cursor
Practices: Git, Debugging, Testing and Validation, Technical Documentation, Requirements Gathering, English and Spanish

Projects

Tekkrew Website | *Next.js, TypeScript, React, Vercel* 2026
- Built and deployed client website end to end using Next.js, TypeScript, and React on Vercel
- Gathered requirements directly from the client and translated them into features
- Used Claude Code and Cursor daily, reviewing every AI-generated suggestion before accepting it
- Verified site behavior across multiple browsers and devices before deploying to production on Vercel

Amazon Opinion Search Engine | *Python, SBERT* 2025
- Built semantic search tool with SBERT embeddings and cosine similarity over 210,762 Amazon reviews
- Compared Boolean, rating-filter, and SBERT retrieval across 5 queries, measuring precision against a baseline
- Cleaned and standardized 210,762 reviews in Python, saving one dataset reused by all three methods
- Documented architecture, methodology, and results in a formal technical report

Diabetes Risk Predictive Modeling | *Python, TensorFlow, Matplotlib, Academic Team Project* 2026
- Trained TensorFlow model on 400,000+ anonymized health records as part of a team project
- Validated accuracy, recall, and F1 against benchmark thresholds, retraining whenever results fell short
- Visualized model performance in Matplotlib to compare results against benchmarks

CUDA-Based Sudoku Solver | *C++, CUDA, Academic Team Project* 2026
- Learned CUDA and parallel computing on a C++ base to build a 3-person team project
- Debugged performance bottlenecks through structured testing and code review with teammates
- Validated correctness across batch sizes from 1,000 to 100,000 against expected results set ahead of time

Experience

Electrician Jun 2021 – Aug 2024
Family Business Support, Part-Time *Houston, TX*
- Diagnosed technical faults on job sites using a repeatable, step-by-step troubleshooting process
- Ran and connected copper and fiber cabling, following exact safety and installation procedures
- Documented completed work for every job and explained findings to clients in plain, non-technical language

Parking Lot Attendant Nov 2024 – Jun 2026
H-E-B, Part-Time *Houston, TX*
- Acted as first point of contact for customers during peak-hour rushes at a high-traffic location
- Resolved customer complaints regularly, staying calm and finding real solutions

Certifications

Fundamentals of Machine Learning and Artificial Intelligence | *Amazon Web Services* May 2026
AI Fluency: Framework & Foundations | *Anthropic, UCC & Ringling* Jun 2026
Anthropic Claude 101 | *Anthropic* Jun 2026
